

---

### 3. Read

---

- Alright, now that we have questions that need answering, we READ
- And we want to do this actively. As you read, you will answer your questions and then taking notes so we better learn the material
- And put those notes into your own words. You will remember them better

---

### 4. Recite

---

- This is important when it comes to learning the material well
- As you complete each section, take some time and go over the questions to see if you can recall their answers from memory
- If you're able to get all the answers right

---

### 5. Review

---

- Go over the whole thing
- Again, and again, and again
